

Today we went sightseeing in the center of Siauliai, we met at one o'clock in the middle of the town, at a place called Kukalu which is the town clock.

The places that we saw were very interesting. We saw a metal fox by the lake of Talksa and a golden archer that is the top of a sundial and visited the cemetery where the philosopher Stasys Šalkauskis, the school we

are visiting is named after him, is buried and also saw some mausoleums.

We finished the tour by going to the cathedral of Peter and Paul.

After that we went to a pizza place called Chilipica, which was very good. We had free-time with our friends at the end of the day, some went to the shopping center, sauna, movie and some went to play pool with their friends.

The one day that we have been here has been great and everybody likes their family. The weather here is pretty cold, but we are use to that, so we will survive.

Greetings from Lithuania
Sólveig and Óskar
