

We woke up early in the morning and then we had breakfast and after that we started our journey to the town Höfn.

First we visited the plant nursery Borg where there were various types of flowers and trees. We were welcomed very warmly and every student was given a good bye gift.

Then we experienced an earthquake of 6.6. on the Richter scale. It was a totally new feeling for us.

After that we visited the amazing waterfall Skógarfoss and we visited the national park at Skaftafell and the unique place Jökulsárlón, a glacial lagoon.

The journey was very exiting we have experienced things we have never tried before. After twelve hours we were in Höfn with a very positive impression about Iceland.
