

A conference was held in Reykjavik on Thursday October 4th. This was on behalf of eTwinning which is one of educational programs of the E.U. Electroinc cooperation between schools was the subject of the conference and how teachers can develop their subject of teaching. On this ocation prizes were given for the best eTwinning projects during the school year 2011-2012. Prizes were given in three categories, playschools, elementary schools and secondary schools.

The project <http://aer.fas.is/> from last years cooperation between FAS and Šiaulių Stasio Šalkauskio Gymnazija in Lithuania about alternative and renewable energy scourses was awarded the prize for the secondary schools. The prize is 175.000 ISK which will be used for equipment for similar projects.

Comments about the project on behalf of the panel of judges were " The project is extensive and ambitious and touches on an important subject. The webpage of the project is comprehensive and well made. A good cooperation and friendship has been formed between the participants and mutual visits the each other countries. The use of I.C.T. is diverse and the product is interesting. During the project knowledge on the subject was increased considerably and much improvement in English and social skills were observed".
