

Hello my name is Pálmi Geir I'm 19 years old and i live in Höfn. I have three sisters and one brother. My hobbies include hunting, fishing, cars, motocross and music. I am studying at FAS for now then I'm going to travel around the world. After that I might go to Australia or Canada to study art and design.

My mothers name is Guðný Sigrún Eiríksdóttir and my fathers name is Sigurgeir Benediktsson. I live on Kirkjubraut 14 with my mom and her husband, all my siblings have moved away to go study.

In the winter there is not a lot to do here but I was in an alternative rock band last year that broke up, that's alright because it kind of sucked, I was the bass player, it broke up because the lead guitar player moved away. Now I just go hunting and riding my dirt bike and of course go to FAS.

But in the summer that is another story. Well the same story actually because the only thing that changes is I work at Skinney the local fish processing plant. During the few summer months in Iceland we do the most we can we go cliff diving, camping and fishing all summer long.

Hjördís our teacher wanted me to mention my car, I don't know why. It is an 1995 Chverolet s10, rat rod style with a rusted hood, my dirt bike is a Kawasaki Kxf250.
