

Labas!

Today we came to school at eight o'clock and from there we went on a long trip. First we went to a garbage dump which was very disgusting and the smell of it was really bad, but we learned a lot about the importance of recycling.

The next place we went to was a farm where we looked at a wind mill, which was very interesting. Some of us have never seen a real windmill before.

On our way to the next destination the driver did not know the way and got lost but that was okay because in the end we found our way. We visited a place that produces electricity from solar cells and saw a solar cell and learned a lot about it, which was very interesting.

Around four o'clock we were in Kaunas the second largest city in Lithuania and everyone went to explore the old town of Kaunas.

After a very fun trip to Kaunas we went back home where we went to sleep because tomorrow we have another long day.

Iki - Amna and Kristjana.
