

Our Wednesday started at 8:00 o'clock in the morning. Icelanders and Lithuanians were working in groups at school: we had to answer the questions about electric bulbs which save energy.

After the hard work we decided to have a break and light snacks. The next activity we had was a visit to an Art gallery and the Glacier exhibition. There we were introduced with interesting stories about Ice age and people who were always attracted by mysterious nature, so we went to glacier museum, (Jöklasýning).

After we had finished our tour of the village, we went to the beach and saw the traditional houses. The houses were made of stone and had thatched roofs. We also saw some of the traditional crafts that the people of the village make.

We had a traditional Icelandic meal at the end of the day. We ate fish, lamb, and potatoes. We also had some of the traditional Icelandic drinks. We had a very good time and enjoyed our trip very much.

The late evening we were in the Rann and the beach. That was a great day.
