

This day we were traveling to the East side of the Iceland. The first place we stopped was aluminum factory “Alcoa” in Reyðarfjörður. Where was presentation ab

out how 4 t of aluminum ore becomes into a 2 t of aluminum oxide and after that it becomes into 1 t of pure aluminum. We even had a chance to see were aluminum is being melted and poured into ingots.

The lecture on the importance of the environment and the role of the company in the community.

The hands-on experience of the importance of the environment and the role of the company in the community.
